

How to Create Massive Amounts of Content in Little Bits of Time

Gail Buckley
www.PLRContentSource.com

I'm a huge fan of getting more done in less time. That means streamlining and eliminating time wasting activities. There's no need to overthink things – especially not now that I have created this method.

The 5X10 method helps you break it all down. You're working toward an overall goal. Plan ahead, have a purpose for making this happen, and allow yourself to have fun with it. Challenge yourself, push yourself, and get it done.

If you break down what you're doing, you can get a lot more done. Trying to tackle huge, unending projects just doesn't work. You can't wrap your mind around that.

If you want to get a lot done in a little bit of time, there are a few things you need to do.

These things are:

- Use the 5X10 method
- Plan and research before you start writing content
- Outline before you start writing content
- Work in short, undistracted chunks of time
- Have very specific goals you're working toward

Do these things and you absolutely will get a lot more done... and a lot more content created... than you ever have before.

This Will Transform Your Business

I'm sure you can see by now that this absolutely will transform your business in ways that you can only imagine right now. Content really can be the thing that helps you turn your business around.

This method is something that is new to you, but that you will very quickly get the hang of. In fact, I think it will become a standby in your business because it just makes so much sense once you start using it. It helps you work better and faster. And the great thing is that you will see results very quickly if you follow this method.

Following the method is key—being committed to the method is key— you have to follow through. Even if you tweak the method some – it doesn't matter, just get content out there and get it done.

Rinse and repeat your way to success. Keep creating content even beyond your initial days with this method. Next, we'll dive more deeply into planning and preparing for the 5X10 method.
